

Lotus Blake

Electromagnetic Brake
0237 24v - 36v systems

Suitable for most medium and large size mobility scooters. Easy to adapt. Check your dimensions to see that it will fit or can be adapted before purchase. Call for details.

The standard mounting holes are 6.5mm on a 78mm PCD. These holes can be elongated or drilled in a new position.

The connection is by two wires (standard across most scooters). It has a release handle with a safety micro switch

The hex nut is 19mm with a 12mm bore and 3mm roll pin. It may be possible to use your original brake pad and hex in this brake if the thickness is +/- 5mm

0237-01 Brake uses 19mm Hex nut for smaller scooters. 8mm bore with D flat and grub screws. Can be bored 8mm - 10mm
